VEGETABLES - Grow your own

Visit our [vegetable garden primer](#) to learn how to start your own productive home vegetable garden from scratch. Everything is there from soil preparation to our step by step guide to growing the 30 most popular home garden vegetables. Eat healthier and safer without chemicals.

LAWNS - Natural weed prevention program

It's time for your first application of Nature's Guide Corn Gluten Meal or Nature's Guide Corn Gluten Meal Spreadable. Twenty-two common weed varieties including crabgrass have been proven to be susceptible to its pre-emergent effects by research done at Iowa State University. Unlike chemical pre-emergent herbicides Nature's Guide Corn Gluten is non-toxic and there is no waiting period after application for kids and pets. [Learn More](#)

FLOWERS - get more months from pansies

With a lack of extended cold weather pansies have been blooming non-stop since fall. Spend a little time to spruce them up and they will last until the end of April.

1. Remove withered blooms and fallen leaves that might be covering them.
2. Apply [Nature's Guide Natural Blood Meal](#) at the rate of 3 lbs. per 100 square feet and water thoroughly.

Garden Tip

Apply Nature's Guide Dried Enriched Molasses now to lawns and flowerbeds to encourage the growth of beneficial microorganisms that help convert the soils natural nutrition and organic matter to a ready to use food supply for emerging plants.

[For more information on molasses and its use in the garden see our video by garden expert Bruce Duely.](#)
