Good for your grass and good for your soil

Any fertilizer can add nitrogen and potash to your soil. Nature's Guide Fall Fertilizer does far more. It contains the perfect all natural ratio for fall feeding of 3-0-5 (NPK). It also contains a blend of dehydrated alfalfa, soybean meal, heat pasteurized poultry litter, Sulfate of Potash, natural humates, dried enriched molasses, and seaweed extracts that add vital organic matter and natural biostimulants to add rich organic matter to the soil for a better lawn now and next spring.

It is just simply the best!
