Premium Turf Food

### Summer Lawn Fertilization

**Give your lawn a head start on summer heat:** The slow release natural nitrogen in our Premium Turf Food will keep your lawn green through the hot summer months. It can be applied on even the hottest days without burning. It adds organic matter from seaweed and humates to strengthen root systems and to help fortify the grass and the soil against drought stress.

### Enjoy the outdoors by sending bugs elsewhere!

#### CedarCide- safe all natural Red Cedar Granules

There was a reason grandma stored clothes in the cedar chest! Bugs hate the odor and fumes given off by natural cedar. By applying these clean easy to spread granules around activity areas in your lawn and garden mosquitos, ants, beetles, chiggers, crickets, chinch bugs, fleas, flies, and numerous other pests relocate to a more hospitable area.

Nature's Guide offers the gardener and landscaper the most complete line of all natural and 100% Organic supplies including: lawn food, specialty plant foods, root stimulator, composts, soil amendments, mulches, planting mixes, insect controls, fungus controls, vinegar and many other natural products.

Sincerely,  
Nature's Guide Products
